

### FEATURES

- Can be internally piloted, or externally piloted to convert valve to zero minimum pressure differential operation by applying auxiliary air.
- Universal, Normally Closed, Normally Open pilot valves with high flow capacity (Ø 9 mm) especially suited for heavy duty industrial applications in hostile environments, such as drilling rigs and refineries
- Balanced poppet construction
- Stainless steel or brass bodied valves with stainless steel internal parts
- The use of first class materials and thorough valves testing ensure a high reliability and a long service life
- The solenoid valves satisfy all relevant EC Directives

**Zero minimum pressure is only achieved if external pressure is applied**

### GENERAL

### PRODUCT SELECTION GUIDE

#### STEP 1

Select basic catalogue number, including pipe thread identification letter. Refer to the specifications table on page 1.

**Example: B307A345F**

#### STEP 2

Select prefix (combination). Refer to the specifications table on page 1 and the prefix table on page 2, respect the indicated power level.

**Example: EM**

#### STEP 3

Select suffix (combination) if required. Refer to the suffix table on page 2, respect the indicated power level.

**Example: V**

#### STEP 4

Select voltage. Refer to standard voltages on page 3.

**Example: 115V / 50Hz**

#### STEP 5

Final catalogue / ordering number.

**Example:**

**EM B307A345 V 115V / 50 Hz**

### ORDERING EXAMPLES:

<b>WSEMT</b>	B 307	<b>A315U</b>	240V / 60 Hz

## EXPLANATION OF TEMPERATURE RANGES OF SOLENOID VALVES

- Valve temperature range The valve temperature range (TS) is determined by the selected seal material, the temperature range for proper operation of the valve and sometimes by the fluid (e.g. steam)
- Operator ambient temperature range The operator ambient temperature range is determined by the selected power level and the safety code
- Total temperature range The temperature range of the complete solenoid valve is determined by the limitations of both temperature ranges above

## ELECTRICAL CHARACTERISTICS

- Coil insulation class F
- Connector Spade plug
- Connector specification ISO 4400 (cable Ø 6-10 mm)
- Electrical safety IEC 335
- Standard voltages: DC (=) 24V - 48V; Allowable voltage variation +10%, -15%  
AC (~) 24V - 48V - 115V - 230V/50Hz; Other voltages and 60Hz are available on request

## ADDITIONAL OPTIONS

- Other pipe threads are available on request
- Ex mb (prefix "PV") execution can be supplied in various cable lengths
- Compliance with "UL", "CSA" and other local approvals available on request
- 1/2" NPT (prefix "T") and M20 x 1,5 (prefix "ET") conduits (aluminium or 316 SS) available for steel solenoid housing
- Special moulded-in solid state components for peak voltage suppression and/or rectification (four diode bridge)

## INSTALLATION

- The solenoid valves have to be mounted vertically and in an upright position for best performance
- Multi language installation/maintenance instructions are included with each valve
- Threaded pipe connection identifier is B = NPT (ANSI 1.20.3)
- Other pipe threads are available on request
- Normally closed construction (F) and normally open construction (G) have internal pilot connections and need 0.7 bar min. operating pressure
- Universal construction (U) needs auxiliary air pressure applied to port connection "A"
- Declarations of conformity are available on request
- Ex e mb (prefix "EM") execution: solenoid enclosure has a cable gland with integral strain relief for cables with an o.d. from 7 to 12 mm and is provided with an internal and external connection facility for an earthing or bonding conductor
